Covered Battery-Embedded Product Recycling & Disposal Information

Responsible Battery Disposal & Recycling Compliance Notice

Pro Design LLC is committed to complying with California Senate Bill 1215 (SB 1215) regarding embedded battery-embedded products. This page provides important information on how to safely recycle and dispose of products that contain embedded batteries.

Important Safety & Disposal Notice

Dispose responsibly. **Do not place battery-embedded products in household trash.**

Battery-embedded products must be recycled or disposed of through approved electronic waste or battery recycling programs in accordance with local, state, and federal regulations.

Improper disposal may be harmful to the environment and may be prohibited by law.

Battery Chemistry Information

Products manufactured or distributed by Pro Design LLC may contain embedded rechargeable or replaceable battery systems, including but not limited to:

- Lithium-ion (Li-ion) rechargeable motor batteries and external battery packs

Battery type varies by product model. Specific battery chemistry information can be found on the website**:** www.inspired-shades.com under CA SB 1215 Covered Battery – Embedded Product Chemistry Disclosure.

For assistance in identifying your product's battery type, please contact customer support.

How to Recycle Battery-Embedded Products

If your product contains an embedded battery (including motorized window treatments), please do not dispose of it in household trash.

You may recycle your product using the following method:

Recycling Drop-Off Locations

Battery-embedded products may be recycled through certified electronic waste or battery recycling programs.

You may use approved recycling facilities such as:

- Local municipal e-waste collection centers
- Certified battery recycling programs
- Authorized retail or distributor return points (where applicable)

Please contact your local waste authority or visit a certified electronics recycling locator to find the nearest drop-off location.

Product Recycling Procedure

To ensure safe and compliant recycling:

1. Confirm product eligibility for recycling by visiting the website to confirm battery type
2. Securely package the product to prevent damage during transport
3. Follow the provided return or drop-off instructions
4. Contact Pro Design LLC customer support for additional guidance
