INSPIRED SHADES™

PRIVACY CHANNELS
HOW TO ORDER

PRIVACY CHANNELS

- Privacy channels are PVC side channels that install to the sides and sill of your window opening. They are designed to enhance privacy for roller shades.
- The shade raises and lowers within these channels, minimizing visibility through the edges and providing a more enclosed appearance.
- Orders include all necessary components to assemble into a U configuration* for the sides and sill of your window opening. **Your privacy channels will arrive as L pieces which stack together to form the U shape.*
- Our privacy channels can be ordered with any shade configuration to suit your needs. However, for the best performance and seamless operation, we recommend pairing them with a square cassette, heat-sealed hem bar, and remote motorized control.
- Channels provide coverage of 1 5/8".
- Available in 5 colors: white, beige, gray, bronze, and black.
- Available for inside mount only.
- Privacy channels ship from our production facility in Ohio.
- **NOTE:** While privacy channels help block some light, they are not a total blackout solution.

HOW TO ORDER

- Orders can be placed directly on the Roller Shade line item. When ordered this way, privacy channels will be rough cut to the size of your window up to 93" x 93". ***See your product guide for pricing details.***
- Privacy channels may also be ordered with 48" or 94" standard lengths for a more cost-effective solution. To place an order, email us at inspired@prodesignllc.net or contact one of our Pro Team members by phone. ***See net pricing below.***
  - 48" Channel $32*
  - 94" Channel $64*

**Net freight $10 for first channel ($3 per additional channel)*
