

INSPIRED
SHADES™

PRO HUB

The Pro Hub is now available for the Inspired Shades Collection.

The Pro Hub offers automated control capabilities for remote motorized shades and communicates with shades through your Internet connection.

AUTOMATED CONTROLS

The Pro Hub provides automated control capabilities with select smart technologies:

- Connector+ app on Smart Phones
- Amazon Alexa
- Control4
- Google Home
- IFTTT
- RTI
- Samsung Smart Things
- Siri Short Cuts

SET UP

The Pro Hub offers multiple Internet connectivity options.

For all Internet speeds including 5G and Fiber Optic, the Pro Hub can be connected directly to routers with an Ethernet cable. For a wireless connection, the Pro Hub can also be paired through 2.4 GHz wifi signals.

Pro Hubs have a range of approximately 100', uninterrupted. For shades on multiple floors of the same home, we recommend ordering one hub per floor.

Pro Hubs are shipped with everything that is needed for the initial set up including a 48" Ethernet cable, 40" power cable, and a quick start guide with links to pairing videos for iOS and Android devices.
